Professional Summary

Information Systems undergraduate at Bina Nusantara University interested in building practical digital solutions and solving user and business problems. Comfortable with system analysis, backend and database design, cloud fundamentals, and UI/UX. Collaborative and adaptable, with the initiative to learn quickly, communicate clearly, and turn requirements into structured solutions.

Education

BINA NUSANTARA UNIVERSITY | 2024–2028
B.Sc. in Information Systems | GPA: 3.62/4.00

SMA AL AZHAR BSD | 2021–2024
Social Science Track

Personal Projects

SENTRI — CYBERSECURITY TRAINING PLATFORM | 2026
Team Leader
AI-assisted training for workplace email, password, and sensitive-data security decisions.

- Designed a PostgreSQL data model for companies, employees, training content, assignments, attempts, results, and learner progress.
- Set up Docker services for AWS EC2 deployment through Coolify and coordinated integration across Deployment, Dispatch, Protocol, and infrastructure.

COMMUNIMATE — COMMUNICATION PRACTICE PLATFORM | Ongoing
Independent Project
Interactive speaking-practice prototype for storytelling, presentations, conversations, and interviews.

- Designed practice flow across scenario selection, prompts, simulated sessions, sample coaching feedback, and progress review.
- Defined a first-version scope around private one-way recordings and actionable coaching; current prototype uses sample data and does not record or analyze speech.

MOJO — UTBK/SNBT STUDY COMPANION | Ongoing
System Design & Infrastructure
Indonesian-language study companion connecting prerequisite skills to subject drills.

- Designed database structure, API connections, and system flow linking the skill map, drill catalog, and practice sessions.
- Connected finite database-backed drills with locally generated relaxed practice; personalized weakness selection and durable relaxed-session history remain planned.

ELKAHFI — PERSONAL PORTFOLIO WEBSITE
Independent Project
Responsive portfolio presenting selected work in system design, software, and interface design.

- Designed and developed a responsive website to present project work and personal branding.

University Projects

COPYIN — DIGITAL PRINTING & STATIONERY SERVICE
Team Leader
Mobile service concept connecting customers to printing, copying, stationery orders, and nearby outlets.

- Mapped customer steps for shop discovery, file submission, print specifications, product selection, delivery, and order history.
- Documented requirements and workflows with use cases and data-flow, class, sequence, and activity diagrams; designed customer screens in Figma.

TUKAKU — REPAIR & MAINTENANCE SERVICE
Team Leader
Digital service concept connecting customers with tradespeople for repair and maintenance work.

- Designed service flows for tradesperson listings, profiles, reviews, service selection, booking, payments, and order history.
- Created interface and presentation materials in Figma and Canva, including customer messaging and profile management.

BATIKERYDAY — EVERYDAY BATIK FASHION
Team Leader
Casual batik fashion concept for Gen Z and younger wearers.

- Developed a contemporary everyday-wear concept for younger batik customers.
- Created a digital garment study in CLO with 2D patterns and outfit views of a notched-collar batik shirt paired with wide-leg trousers.

Skills & Certifications

Programming: SQL, Python, HTML, CSS, JavaScript
Tools & Platforms: PostgreSQL, Docker, AWS EC2, Coolify, Next.js, React, TypeScript, Neon PostgreSQL, Figma, draw.io, CLO, Canva, Oracle Database, Microsoft Excel, Visual Studio Code
Core Areas: System Analysis, Data Modeling, Database Architecture, UI/UX Prototyping, Business Process Analysis, AWS Core Services, IAM Fundamentals, Cloud Security, Virtualization, Basic Networking
Certifications: AWS Academy Cloud Foundations (2026); Microsoft Azure AI Fundamentals (2025)
