Professional Summary

Information Systems undergraduate at Bina Nusantara University with project experience structuring information through PostgreSQL data models, database-backed workflows, and system documentation. Tools include SQL, PostgreSQL, and Microsoft Excel. Interested in applying this foundation to accurate data review, discrepancy follow-up, and clear reporting in ACC's Risk Commercial Business internship.

Education

BINA NUSANTARA UNIVERSITY | B.Sc. in Information Systems | GPA: 3.62/4.00 | 2024-2028

SMA AL AZHAR BSD | Social Science Track | 2021-2024

Personal Projects

SENTRI - CYBERSECURITY TRAINING PLATFORM | Team Leader | 2026

AI-assisted training platform for workplace email, password, and sensitive-data security decisions.

- Designed a PostgreSQL data model for companies, employees, training content, assignments, attempts, results, and learner progress.
- Coordinated integration across Deployment, Dispatch, Protocol, and infrastructure; set up Docker services for AWS EC2 deployment through Coolify.

MOJO - UTBK/SNBT STUDY COMPANION | System Design & Infrastructure | Ongoing

Indonesian-language study companion connecting prerequisite skills to subject drills.

- Designed database structure, API connections, and system flow linking the skill map, drill catalog, and practice sessions.
- Connected finite database-backed drills with locally generated relaxed practice; personalized weakness selection and durable relaxed-session history remain planned.

University Projects

COPYIN - DIGITAL PRINTING & STATIONERY SERVICE | Team Leader

Mobile service concept for printing, copying, stationery orders, and nearby outlets.

- Mapped customer and order workflows; documented requirements with data-flow, class, sequence, and activity diagrams, and designed customer screens in Figma.

TUKAKU - REPAIR & MAINTENANCE SERVICE CONCEPT | Team Leader

Digital service concept connecting customers with tradespeople.

- Designed service flows for listings, profiles, reviews, booking, payments, and order history; created interface materials in Figma and Canva.

Skills & Certifications

Data & Systems: SQL, PostgreSQL, Microsoft Excel, Oracle Database, data modeling, database architecture, system analysis, business process analysis
Additional Tools: Python, Docker, AWS EC2, Coolify, Next.js, React, TypeScript, Neon PostgreSQL, Figma, draw.io, CLO, Canva, Visual Studio Code
Certifications: AWS Academy Cloud Foundations (2026); Microsoft Azure AI Fundamentals (2025)
